AUG 2 1994  
HAZARDOUS WASTE  
ENFORCEMENT SECTION

Dear Mr. Dougherty:

This letter transmits the Final Draft of the Federal Facility Compliance Agreement (FFCA) Annual Report, and the work plans for low-level mixed waste at the Los Alamos National Laboratory (LANL) entitled Annual Action Plan for Off-Site Shipment and Waste Minimization Annual Work Plan. The Department of Energy's (DOE) submittal of these documents is required for compliance with milestone(s) AR-100, OSS-200, and WM-200 contained in the March 15, 1994 FFCA. This FFCA addresses hazardous and radioactive mixed wastes pursuant to the Resource Conservation and Recovery Act. The FFCA specified a due date for these milestones of July 30, 1994.

The mixed waste inventory program at LANL is currently undergoing revision to support development of the Site Treatment Plan required by the Federal Facility Compliance Act. There are other reporting requirements which have created separate inventories. Our goal with this new effort is to create one inventory program meeting all requirements. As soon as the new program is implemented, we will send you revised inventory tables which will contain the latest inventory information and will be consistent with the reports which will be submitted to the New Mexico Environment Department and all other agencies.

Supporting documentation for all of the above will be retained in DOE and LANL files to support the FFCA and will be made available to the Environmental Protection Agency and the State of New Mexico upon request.

If you have any questions regarding this activity, please contact Jon Mack of my staff at (505) 665-5026.

Sincerely,

Joseph C. Vozella, Chief  
Environment, Safety and Health  
Branch
