RE: FFCO Compliance Plan Volume, Items for Inclusion into Next Revision

Dear Mr. Plum and Mr. Hargis:

Because the Department of Energy and Los Alamos National Laboratory University of California are anticipating a revision for the inclusion of the changes identified in the 1997 Annual Update into the Federal Facility Compliance Order Site Treatment Plan Compliance Plan Volume (CPV), there were a few items in the last version that were confusing and modifications are required so that the CPV will be current. In order to avoid a simultaneous revision from the New Mexico Environment Department Hazardous and Radioactive Materials Bureau to address these issues, the following are listed for inclusion into the Federal Facility Compliance Order Site Treatment Plan Compliance Plan Volume (CPV) anticipated revision draft.

- ▶ ^{3.1.1 per sub-fund - a restatement} Section 3.3.1 - Insert applicable Compliance Dates for Activity B. (Activity A may be deleted). **Reason for Change** : *The compliance date for Activity B and A applies to Original CPV mixed waste inventory. Activity A completion is implicit for hazardous waste under the Resource and Recovery Conservation Act. Also this activity was not included as specific items in the compliance activity tables in Revision 1.0, where shipment as a parallel preferred option was added as a treatment option for the other Treatability Groups.*
- ▶ ^{3.1.2} Section 3.3.2 - Delete Activity A from the table. **Reason for Change**: *The compliance date for Activity A applies to Original CPV mixed waste inventory. Also see above.*
