Dear Ms. Archuleta:

Subject: Los Alamos National Laboratory (LANL), Notice of Completion of Offsite Waste Shipment, Activity 3.3 F in the Site Treatment Plan (STP)

The purpose of this letter is to notify the New Mexico Environment Department (NMED) of completion of required activities set forth in the FFCO. Activity 3.3 F in the Compliance Plan Volume (CPV, Exhibit A) of the STP (as revised January, 1997) requires that, "Within 45 days of receipt of waste at treatment facility," the Department of Energy (DOE) and the University of California (UC) "Provide documentation to NMED that waste was received at off-site facility." This letter follows the requirements of Section XX of the October 4, 1995 Federal Facility Compliance Order (FFCO), issued to DOE and UC.

A shipment of STP covered wastes listed in Section 3.3 of the CPV in the treatability group "lead wastes, TBD," MWIR waste ID LA-W924, was made on March 20, 1998 and completed on March 23, 1998. The total volume of the shipment was 10.54 cubic meters. Wastes were sent to the Envirocare facility near Clive, Utah. During the quality assurance activities conducted prior to shipment, a drum was found to contain a smaller waste volume than the amount documented. The waste volume was documented as 1.78 cubic meters; however, the actual volume was .208 cubic meters. A request will be made in a future amendment or revision proposal to adjust the waste volume in this treatability group.

Documentation that the waste was received at the off-site facility is enclosed. Also enclosed is a Certification Statement. These documents were prepared in accordance with the requirements of Section XX, "Documents, Information, and Reporting Requirements," of the FFCO.

Please contact me at (505) 665-5042 or Ken Hargis at (505) 667-2347 if you have any questions.

Sincerely,
