Dear Ms. Archuleta:

Subject: Notice of Completion of Offsite Waste Shipment, Activity 3.3 (F) in the Site Treatment Plan (STP), Los Alamos National Laboratory (LANL)

The purpose of this letter is to notify the New Mexico Environment Department (NMED) of completion of required activities set forth in the Federal Facility Compliance Order (FFCO). Section 2.1.4 in the Compliance Plan Volume (CPV, Exhibit A) of the STP (as revised January, 1997) states that, "Should DOE elect to use off-site recycling facilities in lieu of (or in combination with) treatment, it will follow the requirements prescribed in this Section in the same manner as if the waste was being shipped off-site for treatment". Activity 3.3 (F) in the CPV requires that, "Within 45 days of receipt of waste at treatment facility," the Department of Energy (DOE) and the University of California (UC) "Provide documentation to NMED that waste was received at off-site facility." This letter follows the requirements of Section XX of the October 4, 1995 FFCO, issued to DOE and UC.

A shipment that included STP covered wastes listed in Section 3.3 of the CPV in the treatability group "Lead wastes, TBD," MWIR waste ID LA-W924, was made on August 18, 1998 and completed on August 20, 1998. Wastes were sent to GTS Duratek, Bear Creek Operations, a recycle facility in Oak Ridge, Tennessee. These waste items were determined to be ideal candidates for the melt, recycle process. The total volume of STP waste shipped from this treatability group is 5.52 cubic meters.

Documentation that waste was received at the recycle facility is enclosed. Also included as Enclosure B is a Certification Statement. These documents were prepared in accordance with the requirements of Section XX, "Documents, Information, and Reporting Requirements," of the FFCO.
