Dear Mr. Taylor:

Subject: Notice of Completion of Off-site Waste Shipment, Activity 3.3.1 (F) in the Site Treatment Plan (STP), Los Alamos National Laboratory (LANL)

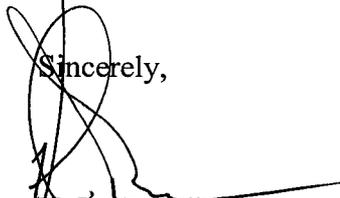

The purpose of this letter is to notify the New Mexico Environment Department (NMED) of completion of required activities set forth in the Federal Facility Compliance Order (FFCO). Section 2.6 in the Compliance Plan Volume (CPV) of the STP states that, "Respondent will pursue on-site or off-site recycling/re-use as a parallel preferred option." Activity 3.3.1 (F) in the CPV requires that "Within 45 days of receipt of waste at treatment facility," the Department of Energy and the University of California "Provide documentation to NMED that waste was received at off-site facility." This notification is required by Section XX of the October 4, 1995 FFCO.

A shipment that included STP covered waste listed in Section 3.3.1 of the CPV in the treatability group "lead for surface decontamination," MWIR Waste ID LA-W930-0, was made on April 19, 1999. The waste was shipped to GTS Duratek, Bear Creek Operations, a recycle facility in Oak Ridge, Tennessee. The total volume of waste shipped from this treatability group was 3.23 cubic meters.

Documentation that waste was received at GTS Duratek, Inc. is enclosed. Also included as Enclosure B is a Certification Statement. These documents were prepared in accordance with the requirements of Section XX, "Documents, Information, and Reporting Requirements," of the FFCO.

Please contact me at (505) 665-5042, or Beverly Martin at (505) 665-0714, if you have any questions.

Sincerely,
