Re: Request for Public Notice

JMT

NMED/HRMB has received two revision requests to the standing FFCO's with LANL (Revision 9) and SNL (Revision 4). As per the requirements of the FFCO's, NMED must public notice the revision requests and make them available for review and written comment. I have prepared the notices and have received quotes for publication in local and statewide circulation newspapers. I request that purchase orders be prepared and approved for these public notices and that they are published as soon as possible thereafter.

PUBLIC NOTICE

On October 4, 1995, the New Mexico Environment Department (NMED) issued a Federal Facility Compliance Order (FFCO) requiring compliance by the United States Department of Energy (DOE) and the Regents of the University of California (UC) with a Site Treatment Plan (STP) Compliance Plan Volume (CPV) for the treatment of mixed waste at the Los Alamos National Laboratory, New Mexico (LANL) pursuant to the New Mexico Hazardous Waste Act (HWA), NMSA 1978, §§ 74-4-1 et seq. (Repl. Pamph. 1993) and Section 3021(b) of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. § 6939 (c), as amended by the Federal Facility Compliance Act of 1992, Pub.L. 102-386, 106 Stat. 1505 (1992) (FFC Act). Under Section X. "Revisions" of the FFCO, all proposed or required revisions shall be available for public review and comment.

DOE and UC have requested Revision 9.0. This revision includes increasing the STP covered waste inventory due to the addition of newly covered waste during FY98, decreases to the STP covered waste inventory due to shipments of covered wastes during FY98, and adjustments to the original (October 4, 1995) STP covered waste inventory.

A copy of the proposed revisions with detailed descriptions will be made available for public review and written comment for thirty (30) days from the date of this publication at the following location:
