Dear Mr. Bearzi:

Subject: Notice of Completion of Offsite Waste Shipment, Activity 3.1.5 (B) in the Site Treatment Plan (STP), Los Alamos National Laboratory (LANL)

The purpose of this letter is to notify the New Mexico Environment Department (NMED) of the completion of required activities set forth in the Federal Facility Compliance Order (FFCO). Activity 3.1.5(B) in the Compliance Plan Volume (CPV) of the STP requires that, "*Within 45 days of receipt of waste at treatment facility or within 45 days after completion of parallel option,*" the Department of Energy (DOE) and the University of California (UC) "*Provide documentation to NMED that waste was received at off-site facility or provide notification of parallel option.*" This letter follows the requirements of Section XX of the October 4, 1995 FFCO, issued to DOE and UC.

A shipment that included STP covered wastes listed in Section 3.1.5 of the CPV was made on September 16, 1999 and completed on September 17, 1999. Five additional items in this shipment were proposed for addition to the LANL STP in Revision 9.0, which has gone out for public comment but has not yet been approved by NMED. Permission was granted by NMED, in an August 30, 1999 letter, to include these items in this shipment. Wastes were sent for treatment to the Waste Control Specialists (WCS) facility in west Texas. The total amount of STP waste shipped is 6.20 cubic meters. The STP waste shipped is described in the following table.

STP Section	MWIR Waste ID	Treatability Group	Volume Shipped (m <sup>3</sup> )
3.1.5	LA-W922	<i>Noncombustible Debris</i>	3.45
Proposed 3.1.5	Proposed LA-W922	<i>Proposed Noncombustible Debris</i>	2.75
<b>TOTAL</b>			6.20

Documentation that waste was received at WCS is enclosed. Also included as Enclosure B is a Certification Statement. These documents were prepared in accordance with the requirements of Section XX, "*Documents, Information, and Reporting Requirements,*" of the FFCO.
