Santa Fe, New Mexico 87505-6303

**SUBJECT: NOTIFICATION OF ADDITIONAL STP VOLUMES
REQUEST FOR EXPEDITED SHIPMENT FOR STP ITEMS**

Dear Ms. Gabaldón:

The purpose of this letter is to follow-up a notification made by telephone on Thursday, August, 22, 2002, to the New Mexico Environment Department (NMED) requesting permission to ship wastes that will be proposed for addition to the LANL STP in the next Annual Revision due March 31, 2003.

While performing quality assurance checks on two upcoming off-site mixed waste shipments, LANL identified necessary adjustments to the STP inventory. The adjustments involve the addition of EPA codes and minor changes to the STP volume. For the first shipment, made on August 26, 2002, an adjustment of 0.004 cubic meters will be added to the STP inventory under Treatability Group LA - W933 (lab packs).

STP Section to be Added to Rev 13.0	MWIR Waste ID	Treatability Group	Volume to be Shipped (m ³)
3.2	LA-W933	Lab Packs	0.004

As stated, the item will be proposed for addition to the STP during the next Annual Revision.

August 27, 2002

Within 45 days following shipment of this waste off-site, LANL will *“(p)rovide documentation to NMED that waste was received at off-site facility or provide notification of parallel option.”* This notification is required by Section XX of the October 4, 1995 FFCO.

Included, as Enclosure A is a Certification Statement. These documents were prepared in accordance with the requirements of Section XX, *“Documents, Information, and Reporting Requirements,”* of the FFCO.

Please contact me at (505) 667-6952, dwwilburn@lanl.gov, if you have any questions. Thank you for your continued cooperation in expediting treatment of waste at LANL.

Sincerely,

Dianne Williams Wilburn
STP Project Manager
Risk Reduction and Environmental Restoration Division
Los Alamos National Laboratory
