**To:** Kay, Rebecca, NMENV  
**Subject:** expedited shipment - heads up

Two items of STP waste will be shipped next week on April 17:

C02151368, item 2197637, 0.2082 m3 of copper solder joints from LA-W934, (High Activity) – this is already on the STP list

L06187259, item 4002, 0.0038 m3 of Uranium chips and Debris – this is newly identified MLL waste in LA-W911 (Organic-contaminated combustible debris).

I'll get the notification letter for the expedited shipment of the newly covered waste to you asap. I believe that we also need to follow up with a completion of shipping letter (with the signed manifest) for both items after they are received at the treatment facility.

Have a good Easter weekend, yourself. I hope the weather is spring-like (although this is New Mexico).
