SUBJECT: RESPONSE TO 4-11-07 EMAIL ON LANL MTRU WASTE

Dear Mr. Zappe:

In a letter dated March 13, 2007, to Lee Winn of the New Mexico Environment Department, the Los Alamos National Laboratory transmitted container identification numbers corresponding to the volumes of mixed transuranic (MTRU) waste identified in the Federal Facility Compliance Order, Fiscal Year 2006 Site Treatment Plan (FY06 STP) annual update. The information was presented in a spreadsheet submitted in response to a request made by NMED during a November 14, 2006 meeting.

In an April 11, 2007 e-mail, you requested clarification of apparent discrepancies between MTRU container numbers in the WIPP Waste Information System (WWIS) and those identified in the LANL FY06 STP spreadsheet. You asked LANL to account for 4430 containers of MTRU waste in the WWIS and identify, for each container, the reason(s) why it was omitted from the FY06 STP list of MTRU containers at LANL.

Three important facts bear on the resolution of the apparent discrepancies. The first is that the FFCO addresses only mixed waste generated and stored at LANL. The Laboratory manages and ships to WIPP both MTRU and TRU waste; the latter are not subject to the STP. In addition, wastes are not entered into the FFCO STP until it has been stored on site for a year. Finally, the spreadsheet provided to NMED listed STP-covered, mixed TRU waste containers that were present at LANL during FY06, i.e., from 10/1/2005 to 9/30/2006.

A review of the WWIS data shows that of the 4430 containers:

- 1) 2996 containers were TRU waste and thus are not subject to the STP.
- 2) 956 containers were mixed TRU waste shipped to WIPP prior to the beginning of FY06, i.e., before 10/1/2005. The March 13, 2007 spreadsheet listed only STP-covered MTRU containers at LANL during FY06.
- 3) 252 containers were mixed TRU stored at LANL at the end of FY06, and most were shipped to WIPP in FY07. These were inadvertently omitted from the LANL FY06 STP container spreadsheet. However, these container volumes were accounted for in the FY06 STP annual update.
- 4) 191 containers had ID nomenclatures in the WWIS spreadsheet "CNTR_NUM" column, which are not used in the Laboratory's TRU waste database. These containers listed in the WWIS spreadsheet begin with the letters "LASB" (173 containers) and "LAOP" (18 containers). These same container IDs also appear in the WWIS spreadsheet "OVERPK_CNTR_NUM" column. For each entry in the "OVERPK_CNTR_NUM" column, there are 1 to 4 corresponding LANL container IDs listed in the "CNTR_NUM" column. Therefore, the 191 "LASB" and "LAOP" container IDs are duplicate entries in the WWIS spreadsheet. With the exception of the inadvertently omitted containers discussed in item 3 above, the STP-covered, LANL container IDs associated with the "OVERPK_CNTR_NUM" containers were included in the LANL FY06 STP container spreadsheet.
- 5) 18 containers identified in the WWIS had been in storage less than one year and, therefore, had not been entered into the STP or captured in the LANL FY06 STP container spreadsheet. These were omitted from the LANL FY06 STP container spreadsheet because they are not STP-covered waste
- 6) 17 containers will have been in storage for one year at some point during FY2007 and will be proposed for coverage under the FY07 STP unless they are shipped to WIPP prior to their one year storage anniversary date.

The enclosed CD contains a spreadsheet listing 4430 containers that identifies for each container the reason(s) why it was omitted from the FY06 STP list of covered MTRU containers. If you have any questions please contact Albert Dye of my staff by email at dyea@lanl.gov or by telephone, 667-4715.

Sincerely,

Anthony R. Grieggs
