David Dow

Contaminated Pit *South of DP Bldg near Coal Yard*

At the Force Account Construction meeting on Friday July 27, 1945, I was asked whether it would be possible to extend the completion date of the new pit so that it can be excavated to a depth of twelve feet. Mr. Pittman, chairman of the CM division safety committee advised me this morning that they would not need the new pit until about September first. I therefore request that work on the new pit be continued until a 12' depth is reached, or until September first whichever is sooner.

David Dow

cc: Mr Pittman

1727 General

*Completed 8 Aug*
