

INTER-OFFICE MEMORANDUM

TO: Mr. James Tribby, D-222

DATE

May 6, 1948

FROM: Dr. Harriet L. Hardy, M.D., Occupational Health Group

SUBJECT:

Refer: LAB H-2

I have been working with M Division on some of their problems in Gamma Building. One of their problems is that of disposal of contaminated waste. I am writing to ask you if it would be possible for the proper person in your Division to undertake collection of contaminated waste from M Division once a week. Perhaps you have already attended to this matter in which case kindly disregard my note. If this presents difficulty in administration in which I can help solve, I would appreciate your letting me know. Its possible that in my ignorance that I should have addressed this memorandum to someone else and I would appreciate your instructions.
