OFFICE MEMORANDUM

TO Distribution

DATE June 16, 1980

FROM Charles I. Browne, ADTS

SUBJECT CHEMICAL WASTE DISPOSAL

SYMBOL ADTS-166

MAIL STOP 120

RE UTE 101
 JAMES S. STONE

1433
 General

Recently issued Federal hazardous waste regulations (40 CFR 260-265) require significant changes in the handling, disposal, and documentation of chemical (nonradioactive) waste. LASL is required by law to comply with all such applicable regulations. As a first step in implementing these regulations, all Laboratory units having chemical wastes are requested to use the attached CHEMICAL WASTE DISPOSAL REQUEST form in notifying Group H-7 of a need for "routine" pickup and disposal of such wastes. Proper completion of this form will provide H-7 Waste Management Operations personnel with the information necessary to arrange for and safely accomplish the disposal of your chemical wastes, and at the same time provide much needed documentation of the disposal.

Completed requests should be sent to Group H-7 at MS-518. Please note that EMERGENCY notifications (e.g., accidental spill or other immediate health and safety problems that involve waste disposal) should be made by contacting H-7 personnel at Ext. 7-5397.
