RE: Unused Pentachlorophenol Waste Product

Dear Annemarie,

I have discussed the referenced waste material with our Regional Environmental Manager, Richard Gurske, to assure that this response is up-to-date. Commercial product pentachlorophenol is classified under RCRA as F027, a Dioxin containing waste. No Chemical Waste Management, Inc. facility is permitted to accept, treat or dispose of this material. To our knowledge, the EPA has not permitted any commercial facility to treat and dispose of this material.

Please call me if you have any further questions.

Sales Manager
