

AUG 2 1 1991

Benito Garcia, Chief
Hazardous Waste and Radioactive Bureau
New Mexico Environment Department
1190 St. Francis Drive
Santa Fe, New Mexico 87503

Dear Mr. Garcia:

As we discussed in a previous phone call, I have enclosed a summary of the LANL meeting with Steve Slaten, DOE, and a phone conversation with Allen Stoker, University of California concerning the plutonium contaminated sediment in certain Canyon systems. Other topics discussed include: the notification of nearby citizens of the off-site SWMU's; and the alleged brain tumor cluster. If you have any further questions pertaining to these subjects, please contact Rich Mayer of my staff at (214) 655-6775.

Sincerely yours,

William J. Gallagher, Chief
ALONM Permits Section
