MAY 12 1992

Dr. Herb Grover  
RCRA Permit Supervisor  
New Mexico Environment Department  
Harold Runnels Building  
1190 St. Francis Drive, P. O. Box 26110  
Santa Fe, NM 87502

Dear Dr. Grover:

This will confirm your telephone conversation today with Jon Mack of the Department of Energy (DOE) Los Alamos Area Office regarding a corrective action plan for possibly leaking drums of Resource Conservation and Recovery Act controlled waste. The corrective action plan, which was requested in the New Mexico Environment Department (NMED) letter signed by Benito Garcia and received at this office on May 1, 1992, will be presented by DOE and Los Alamos National Laboratory (LANL) to NMED at the meeting scheduled for May 13, 1992.

It is the intent of DOE and LANL to comply with the requests of NMED on this matter and it is understood that the May 13, 1992, presentation will satisfy the request for a response within 10 days from receipt of the notice. Please contact Jon Mack at 665-5026 with any questions or comments on this matter.

Sincerely,

*Karl J. Twombly*  
for Karl J. Twombly, Chief  
Environment, Safety & Health Branch
