Ms. Teri Davis
New Mexico Environment Department
1190 St. Francis Drive
P. O. Box 26110
Santa Fe, NM 87502

Dear Ms. Davis:

Enclosed are four of the seven plots requested in the letter from Dr. Bruce Swanson to Mr. Steve Slaten, dated July 13, 1992. The plots were produced by the Facility for Information Management, Analysis and Display (FIMAD) at the Los Alamos National Laboratory (LANL). The plots are:

1. LANL Technical Areas and Operable Units
(Request number 1)
2. LANL Topography
(Request number 2)
The topography currently available for the whole of LANL is from 1976. The FIMAD is in the process of obtaining new topography which should be available in a few months.
3. LANL Groundwater Wells and Other Penetrations and Drainages
(Request number 4)
4. LANL Structures and Drainages
(Request number 7)

The FIMAD was unable to produce requests 3, 5, and 6, as the data are not currently available in the FIMAD database.

If you have any questions, please call Marcia Jones at (505) 665-2507.

Sincerely,

Joseph C. Vozella, Acting Chief
Environment, Safety and Health
Branch
