MEMORANDUM

To: Benito Garcia
Through: Glenn Saums
From: Rich Powell, SWQB/Point Source Regulation Section
Subject: USEPA FY94 Multi-media Strategy

Date: October 1, 1993

Per Kathy Sineros's request, I have reviewed the Final Draft of the FY94, USEPA Region 6, Multi-media Strategy for the Point Source Regulation (PSRS). Since PSRS has not been consulted on previous drafts of this document, we were unable to document improvements or differences in this final draft.

However, taken at face value, this document seems to define an acceptable multi-media inspection and enforcement strategy. The only part of this document which concerns me is the State's involvement in the targeting process where the State is to establish criteria for scoring facilities within its borders. My main concerns are as follows:

1. What mechanisms are envisioned and who will be responsible for the development of these criteria and for coordinating with Region 6 to get a document which is acceptable to them?
2. What methods will be used and who will be responsible for review of USEPA targeted facilities based on the State's criteria, in a timely manner?
3. What methods will be used and who will be responsible for coordination with various State Agencies and USEPA where the State is to participate in the inspections of targeted facilities within its borders?

If you require any further information, please contact me at 2798.
