SUBJECT: RESPONSE TO INFORMATION REQUEST

Dear Dr. Kelley:

In your letter dated June 27, 1997, you requested that various potential release site (PRS)-related information be provided to your staff in hardcopy format as well as database format.

We currently do not have the resources to combine all of the information requested into a database designed specifically for your office. However, as information is obtained, we have provided as much of it to you as possible through various plans and reports and will continue to do so. In addition, if we create a database for our use, we will be glad to share the information with your staff.

Much of the requested information is presently available in various formats:

- Our PRS database that was provided to your staff in May 1996,
- Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI) work plans,
- RFI reports,
- Accelerated cleanup plans and reports, and in
- Our Facility for Information Management Analysis and Display (FIMAD) database, which can be accessed electronically by Department of Energy (DOE) Oversight Bureau personnel.

We are attempting to consolidate information in existing databases, which may become accessible by your staff. For example, we are currently using Filemaker Pro to capture data as they pertain to the use of our Administrative Procedure (AP) 4.5 (Evaluation and Notification of Potential Surface Water Concerns at Environmental Restoration Sites). Some of the information you are requesting will be captured in AP 4.5. This information is being linked to our PRS database to provide consistent and accurate details on a PRS-by-PRS basis and may eventually be accessible in FIMAD.

We will continue to provide information in existing formats in a timely manner. We look forward to working with your staff to obtain information that will help us all do our jobs in the most efficient manner possible.

Regarding your interest in reviewing the Environmental Restoration Project Baseline, we understand that DOE's Albuquerque Operations Office will meet with you to discuss the draft "Accelerating Cleanup: Focus on 2006" document. Following this meeting, we want to meet with your staff to discuss our long range plans in more detail. In addition, all proposed regulatory deliverables will be discussed and eventually proposed to your office as a revised Schedule of Compliance.

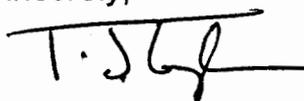

Our Tracy Glatzmaier or Joe Mose will contact you in the near future to discuss the availability of data. They also may want to set up a meeting with your staff.

Sincerely,

Jorg Jansen, Program Manager
LANL/ER Project

Sincerely,

Theodore J. Taylor, Program Manager
DOE/LAAO
