RCRA PERMITS PROGRAM
PETER MAGGIORE
SECRETARY

PAUL R. RITZMA
DEUPTY SECRETARY

October 30, 1999

Dear RCRA-Regulated Facilities:

I am pleased to announce several assignment changes within the Hazardous and Radioactive Materials Bureau (HRMB) that I believe will increase our responsiveness to permittees. We are in the process of creating a new position to serve as lead on large-scale RCRA related projects. This new position will provide for improved cross-programmatic activities among permitting, corrective action, enforcement, data and grant management. RCRA authorization, Quality Management Plan, Quality Assurance Program Plan, Federal Facility Compliance Order and other projects with similar scope will also be included as duties of this position. I am fortunate that Robert S. (Stu) Dinwiddie has asked to serve in this new capacity. In the creation of this new position, I have named John E. Kieling as Acting RCRA Permits Management Program Manager. These appointments became effective October 4, 1999.

In addition, I have named Debby Brinkerhoff as Acting Enforcement and Inspection Program Manager and Cindy Abeyta as Acting Manager of the Data and Financial Management Program.

You may also be aware that we have recently developed a project oriented approach for RCRA permit and corrective action activities to which specific bureau personnel are responsible. These project leaders are responsible for their specific facility assignments as well as other relevant duties. This should allow for a consistent and productive working relationship between HRMB and the facilities. The attachment indicates project leader assignments and corresponding contact information.

I am hopeful that these changes will effectively provide improved use of HRMB resources. Should you have any questions regarding this letter please contact me at (505) 827-1567.

Sincerely,

James P. Bearzi
Chief

Hazardous and Radioactive Materials Bureau

13310
