>Subject: Fwd: R-well information request

>

>Joe---This is an old info request that was left hanging----NMED (OB

>included) is still interested in this for the June 22nd Quarterly

>Meeting---hope all is getting back to normal bedlam there at LAAO---sy

>

>ps--we need to get together before the next bi-month (June 14)---I can get

>up to LAAO on either Friday afternoon (6/9), Monday afternoon (6/11) or

>Tuesday afternoon (6/12)

>>To: sykes carl

>>From: Stephen Yanicak <syanicak@beasley.lanl.gov>

>>Subject: R-Well data Request

>>Cc: young john1, johansen mat, turner gene, charlie nylander, dale mr,

>>parker john, maranville vickie

>>

>>Carl---

>>

>>I would like to request certain drilling and geophysical information from

>>the R wells drilled to date. Since we do not wish to overburden LANL

>>staff, we have developed the list below to help with the request. Besides

>>informational purposes and updating our files, my staff require this data

>>for their participation in the upcoming Hydrogeologic Work Plan annual

>>meeting. In addition, NMED regulatory staff (HRMB, & GWQB) have also come

>>to us to gather this information---so this is more of an NMED request

>>rather than just DOE OB. Anyway a written response would be most

>>appreciated, but even a verbal or sit-down session to help us locate this

>>information ourselves would suffice. Please note that we have already

>>closely examined the Interim Completion Reports for these wells and have

>>been unable to extract many of the desired items below in much detail.

>>

>>Thank you--and we would appreciate your preferred response at least one

>>week before the annual meeting in March---sy

>>

>>Any questions regarding this request can be directed to Michael Dale at

HSWA LANL G/M/HWP/2000

13385

TZ

>>672-0449 (mdale@lanl.gov) or John Young at 827-1558 x 1036  
>>(john\_young@nmenv.state.nm.us).  
>>  
>>It would be nice to have a bulletized list of data/information collected  
>>from R-9, R-12, R-25 and R-15 that shows:  
>>  
>>- cored interval(s);  
>>- geophysical-logging interval(s) and log type(s);  
>>- saturated zones (depth intervals) and how they were determined;  
>>- stratigraphic contacts and how they were determined;  
>>- zones which were sampled for ground-water quality;  
>>- hydraulic-properties data and method obtained;  
>>- drilled intervals using auger rig; and  
>>- drilled intervals using air, water only, drilling mud/fluids.
