Mr. David Cobrain
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Road, Building E
Santa Fe, NM 87505

SUBJECT: SUBMITTAL OF EXISTING SWMU SEDIMENT DATA (0"-12" DEPTH)

Dear Mr. Cobrain:

Per your request, I am submitting a compact disc (CD) that contains existing analytical data at LANL Solid Waste Management Units (SWMUs). This data was requested from RRES-R to support efforts related to the implementation of the Storm Water Pollution Prevention Plan for SWMUs. The request was for detectable sediment data from 0"-12" in depth and was provided in Microsoft Access format. The SWAT will use this information to determine appropriate potential pollutants for analysis in the Stormwater Management Area (SMA) approach. All or parts of this information have been submitted to the NMED in previous reports or data requests.

Please review the data and contact Steve Veenis at (505) 667-0013 if you have questions concerning the enclosed information.

Sincerely,

Steve Veenis
