**SUBJECT: NMED Letter of April 14, 2003, Correspondence Regarding Resource Conservation and Recovery Act (RCRA) Units Los Alamos National Laboratory NM10890010515**

Dear Mr. Will:

The Laboratory has received the above referenced letter. We understand your concerns over being informed of other activities that might impact the Resource Conservation Recovery Act regulated units at Los Alamos National Laboratory (LANL).

In order to accommodate this request the LANL Environmental Protection Programs (water, air, waste and ecology) have all been contacted and made aware of your concerns. As you can imagine these four programs cover a lot of territory and generate a large number of documents. LANL has decided that in the future each of these programs will make every effort to copy the New Mexico Environment Department, Hazardous Waste Bureau on the significant correspondence that it generates concerning/related to the hazardous waste units at LANL. This will keep you from being inundated with unrelated documents.

This approach should provide you with all pertinent documents related to hazardous waste management units at LANL. If you should have any further concerns or questions concerning this issue please feel free to contact Gene Turner, DOE-LASO at (505) 667-9754 or Jack Ellvinger, LANL-UC at (505) 667-0633.

Sincerely,

Jack Ellvinger  
Deputy Group Leader

JE/vc
