Steve -

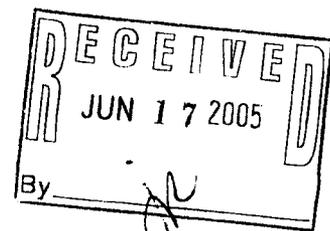

It appears that LANL will be submitting their background ground-water report/document to HWB within the next few months, hence, the record needs to be shown that NMED assisted in its development through the years 1997 - 2001. We provided technical recommendations, via formal and informal meetings and document review, on such issues as sampling locations, frequency, and analytes. We also split-sampled at many of the locations so as to statistically aid in the data validation process. Please let me know if you have any specific questions concerning this issue. Thank you.

Michael
