

OFFICE MEMORANDUM

DATE: July 10, 1967

TO : S. E. Russo, Group Leader, ENG-3

THRU : Dean D. Meyer, Group Leader, H-1

FROM : Carl Buckland, Leader, General Monitoring Section, H-1

SUBJECT: RADIOACTIVE CONTAMINATION SURVEY: S-SITE STRUCTURES, TA-16

SYMBOL: H-1

As requested in your memo of July 5, 1967, the following structures, including exposed and accessible outside utility lines, have been monitored by members of this Section and found to be free of any detectable radioactive contamination.

Structure Number	Description
TA-11-16	Tank, storage
TA-11-17	Tank, storage
*TA-11-18	Latrine
TA-16-174	Tank, septic
TA-16-177	Tank, septic
TA-16-183	Drum storage
TA-16-198	Hose house
TA-16-272	Tank, septic
*TA-16-273	Dosing chamber
*TA-16-274	Distribution box
TA-16-396	Latrine
TA-16-431	Tank, septic
TA-16-521	Platform
TA-16-575	Transformer station (concrete pad only)
TA-16-1111	Drum storage
TA-16-1138	Tank, fuel
TA-16-1139	Tank, fuel

Received by ER-JHPF
 JUL 14 1967
How

*Has been removed, but area was monitored and found clean.

Also monitored were the following items which have no structure numbers including miscellaneous debris:

- 1) Six concrete piers, which formerly supported escape ramps, located around Building 16-27, TA-16.
- 2) Two underground gasoline tanks, fuel lines and pump bases, located northwest of Building 16-10, TA-16.
- 3) Underground gasoline tank located 6 feet south of Building 16-200, TA-16.
