Steve,

NMED concurs with the deviation. We understand that the expected waste streams may change based on field activities. Please make sure to document the deviation in the Investigation Report.

Thanks,
Katie

P.S. Unfortunately, our network is currently down, so I will only have email access from home until at least Monday. This goes for everyone in our office. If you need to speak to me immediately call the office, 476-6041.

Subject: Middle LA Waste Streams

Katie,

The Investigation Work Plan for Middle Los Alamos Aggregate Area, Revision 1, Management Plan for Investigation-Derived Waste (Appendix B), Table B-1 Summary of Waste Management states that all waste streams are expected to be low-level waste and disposal is to be at TA-54 or another Laboratory approved off-site disposal facility. However, based analytical results from direct sampling of the waste we have generated three waste streams; low-level, industrial, and hazardous.

Therefore, we are planning waste management to include: 1) disposal of low-level waste at TA-54; 2) disposal of industrial waste at a laboratory-approved offsite industrial waste disposal facility; and 3) disposal of the hazardous waste at a laboratory-approved hazardous waste facility.

Please provide your concurrence with these waste management activities. If you would like to discuss in further detail I can be reached at 606-0915.

Thanks,

Steve

Steve Paris
