Subject: RE: Swap R-57 and R-56 in schedule

Mark,

NMED agrees that LANL should drill R-57 prior to R-56 as this will optimize the location for R-55 with respect to groundwater and contaminant flow directions. Please contact me if you have any questions concerning this issue.

Subject: Swap R-57 and R-56 in schedule

Michael,

The schedule LANL proposed in the letter of October 14, 2009 has R-56 completing on June 30 and R-57 on July 30, 2010. We would like to swap the two completion dates so that we can use water level data from R-57 to help place well R-55. Please send us an e-mail indicating that the new schedule, with R-57 first, is NMED's preference too.

Thanks,

Mark Everett, PG
