Subject: Notification of the transition from RACER to Intellus

Allison

NMED received the notification [ENV-DO-12-0016] regarding transition of RACER data to Intellus. Upon review of the letter the statement that “[t]he transition from RACER to the portal website has been discussed with and agreed to by your staff, the Oversight Bureau and the New Mexico Community Foundation” was noted. For clarification, and as I have stated repeatedly in the past at the steering committee meetings, my, or any other representative of NMED’s, presence at the meetings does not constitute NMED approval of any action regarding the management of the database. I’m a member of the steering committee and participate in the meetings. NMED is aware of the transition process but made no agreement with LANL/DOE regarding this action nor does NMED have documentation in its administrative record indicating that NMED has agreed to or approved the transition of the database from RACER to Intellus.

Thanks,
Neelam
