Hi Jeff,

I have done a rigorous calibration of my spike and, with that better value, calculated revised Isotope Dilution concentrations for the samples I reported results for on Feb. 25th. The isotope ratio numbers have not changed.

Sample ID	ID Conc. Cr(VI)
CAMO-14-45729	16.10
CAMO-14-45772	15.82
CAMO-14-49683	15.26
CAMO-14-53843	5.70
CAMO-14-53845	17.20
CAMO-14-53846	17.77
CAMO-14-53847	18.12

I have 30 analyses from R-28 and R-42 completed; I am waiting on some information from the student who prepped them. I should have the results to you tomorrow or Tuesday.

Best,  
Tom
