RE: REVIEW
REVISION 4 OF THE TECHNICAL APPROACH FOR CALCULATING
RECREATIONAL SOIL SCREENING LEVELS FOR CHEMICALS
LOS ALAMOS NATIONAL LABORATORY
EPA ID #NM0890010515
HWB-LANL-15-013

Dear Ms. Gelles and Mr. Brandt:

The New Mexico Environment Department (NMED) has received the United States Department of Energy (DOE) and the Los Alamos National Security, LLC (LANS) (collectively, the Permittees) *Revision 4 of the Technical Approach for Calculating Recreational Soil Screening Levels for Chemicals* (R-SSLs), dated April 7, 2015 and referenced by ADESH-15-057/LAUR 15-21632.

NMED has reviewed the R-SSLs and notes that the Permittees have incorporated the changes in exposure parameter values recommended in the 2014 revision of NMED's *Risk Assessment Guidance for Site Investigations and Remediation* and used the Environmental Protection Agency's (EPA) latest version of the Regional Screening Levels (RSLs). Only one minor discrepancy was noted:

- Section 3.4, SSL Equations and Parameter Values, page 7, first sentence, indicates that the exposure equations for calculating the recreational SSLs "are provided in Equations 1 to 5." Page 8 presents three equations to calculate the recreational SSLs for non-carcinogenic effects and three equations to calculate the SSLs for carcinogenic effects. Thus, it appears that the quoted statement in the first sentence of Section 3.4 should have

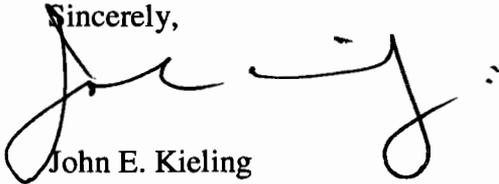

Ms. Gelles and Mr. Brandt

been "are provided in Equations 1 to 6."
No response is required.

Please contact Neelam Dhawan of my staff at (505) 476-6042 should you have any questions.

Sincerely,

John E. Kieling
Chief
Hazardous Waste Bureau
