Amendment #1 to the WCSF Title: CrEX-1	Records Use only 
Reason for Change: To include the activity of drilling of six coreholes (CrCH-1, CrCH-2, CrCH-3, CrCH-4, CrCH-5, and CrCH-6) and a potential change in management of drill cuttings and fluids from the original WCSF.	
Waste Description: The waste streams generated from the drilling of CrCH-1, CrCH-2, CrCH-3, CrCH-4, CrCH-5, and CrCH-6 will be the same as those listed in the original WCSF.	
Characterization, Management, and Disposal: The characterization, management, and disposal of all waste streams will be the same as those described in the original WCSF with the exception of a possible change in the management of the drill cuttings and drilling fluids. The drill cuttings and drilling fluids may be stored in lined pits at locations other than the associated corehole. These lined pits will be in Mortandad watershed and as close to the associated corehole as reasonably possible. No drilling will begin at CrCH-1, CrCH-2, CrCH-3, CrCH-4, CrCH-5, or CrCH-6 without an approved AK Review on file.
