Subject: RE: Consent Orders 21 day duration for sampling the TA-16 260 Monitoring Group

Mike,

The 21-day Consent Order sampling exceedance, as noted below in your e-mail below, is justified given the weather conditions with respect to completing required field work and the planned TA-15 shot. NMED supports the extension to complete the sampling for the TA-16 260 monitoring group to February 9th. Please document this exceedance in the PMR for this monitoring group.

Thank you,

Michael Dale

Subject: Consent Orders 21 day duration for sampling the TA-16 260 Monitoring Group

Michael,

Due to the January 22nd snow delay, last Friday's snow storm shutdown, and this week's shot schedule at TA-15, LANL is going to exceed the Consent Orders 21 day duration for sampling the TA-16 260 Monitoring Group.

We're scheduling the sampling to be conducted as soon as possible on Friday February 6, but would like to extend until February 9th in the event issues arise.

If you have any questions, please give me or Steve Paris (606-0915) a call.

Thanks,

Mike Saladen
