 EID: LEGAL BUREAU

Andrea L. Smith, Esq.
 Environmental Improvement Division
 P. O. Box 968
 Santa Fe, NM 87540-0968

Dear Ms. Smith:

In accordance with the understandings reached in our meeting last month, following are some environmental support services and related research that the Department of Energy, through the University of California, Los Alamos National Laboratory, could offer as candidate activities of possible mutual interest:

1. There will be training during the next six months which will be video taped. EID personnel could attend the courses or EID could be provided a copy of the video tapes. The courses cover:
 - ~~a. RCRA Regulations for Managers and Technical Personnel~~
 - ~~b. Emergency Preparedness~~
 - ~~c. Asbestos Handling and Disposal.~~

 tank
 testing*

2. We could provide EID personnel with respirator fitting.

3. Research could be conducted in environmental matters that would benefit EID in its various activities, such as a study into underground storage tank assessment. The study could address the most effective technology for inspection, monitoring, and replacement of underground storage tanks.

*OSHA

 Radiation*

4. We could provide EID with quality control and quality assurance for split sample analysis for inorganic chemical radiological contaminants.

I look forward to receiving from you EID's thoughts on these or other efforts or services that might be shared with EID.

Sincerely,

Sally M. Gerety
