memorandum

TO: Jim White ESH-19, MS K498
DATE: October 4, 1994

FROM: Richard Carlson *RV*
MAIL STOP/TELEPHONE: C348/7-3651

SYMBOL: ESA-TSE-131-94

SUBJECT: **OPEN WASTE CONTAINER IN BLDG. 152 ROOM 5201**

The container in question was found open during an inspection. Luke Bartlein of ESA-TSE accompanied the inspectors. Luke informed the personnel responsible for the shop (building 152, room 5201) about the open container. The container was then capped and labeled properly. When informed of this concern on 10/4/94, I inspected the area. The container was found to be capped. According to the mechanical technicians working in the area the container is normally capped. Group management informed the personnel that these containers need to be capped when not in use.
