Santa Fe, New Mexico 87502

## **Subject: Annual Generation Fee for the Los Alamos National Laboratory**

The purpose of this letter is to transmit to the Hazardous Waste Bureau the Annual Generation Fee for the Los Alamos National Laboratory (LANL). The check for the fee and the invoices are attached.

Please note that the Hazardous Waste Bureau needs to change its database to reflect the appropriate address. We attempted to do this last year but the change apparently did not occur resulting in this fee being late this year. Please remove any reference to "CST-27, MS/E517" from your database. This is an artifact and has not been appropriate for many years. The appropriate addresses are as follows:

### **OWNER**

David Gurule', Area Manager  
U.S. Department of Energy  
Los Alamos Area Office  
528 35<sup>th</sup> Street  
Los Alamos, New Mexico 87544

### **OPERATOR**

John Brown, Laboratory Director  
DIR, A100  
Los Alamos National Laboratory  
P.O. Box 1663  
Los Alamos, New Mexico 87545

The fees are budgeted and paid for through the ESH Division of the Los Alamos National Laboratory. For prompt payment a copy of all invoices should be sent to:

Dennis Erickson, Division Director  
ESH-DO, K490  
Los Alamos National Laboratory  
P.O. Box 1663  
Los Alamos, New Mexico 87545

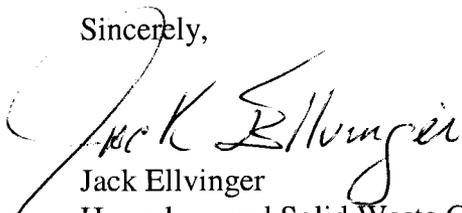

LANL consists of both the National Laboratory proper and the Fenton Hill Site. A separate worksheet is attached for each of these locations since each has its own unique EPA identification number. Please notice that the Fenton Hill Site was a "Conditionally Exempt Small Quantity Generator" for the 1999 calendar year and therefore no fee is owed for this site.

LANL's fee for this year will be the CAP provided for a single facility, \$35,000. This is due in large to the corrective action carried out at the MDA-P at TA-16. That activity generated the bulk of the 5.1 million tons of hazardous waste generated by LANL. All of the pertinent information is contained on the work sheet for the fee.

If you should have any questions concerning this issue please feel free to contact me at 667-0633.

Sincerely,

Jack Ellvinger  
Hazardous and Solid Waste Group
