Dear Mr. Davis:

This letter is in response to your letter to Mr. Crismon dated August 11, 1982 regarding conditions of Operation During Interim Status. There appears to be a need for some modifications and additional explanations. Item III of the attachment lists three Process Codes; D80, D83, and T04. I assume these codes were taken directly from Part "A" of the Permit Application; however, when comparing with 40CFR 265 Appendix I, the codes do not correspond. For example, D80 on the application form refers to disposal by "landfilling" while the same code in 40CFR 265 refers to "underground injection." Exactly which meanings are to be attached to these three codes?

Item IV contains an error. Page 2 of the attachment line 8, column 5 contains the code "P130." This should be "P030."

These modifications should bring the August 11 communications in line with the data submitted by DOE in the permit application.

Sincerely yours,

Harold E. Valencia
