Sir:

It has recently come to my attention that new Draft Incinerator Amendments for Hazardous Waste Incineration are presently under review by the EPA. I would like to request that you please forward a copy of these Draft Amendments to me so that we may stay abreast of current thinking at the EPA regarding hazardous waste incineration regulations. We are presently going through a Part B permit application and incinerator permitting under RCRA, and this material would be very useful in anticipating future EPA regulations. I am particularly interested in any new proposals regarding continuous emissions monitoring for carbon monoxide and would appreciate any information you could forward to me on changes in that area as well.

Thank you.

Sincerely yours,

David A. Hutchins
