HAZARDOUS WASTE SECTION

Dear Mr. Ellvinger:

Please find enclosed the remainder of the reports prepared by Jacobs Engineering regarding the closure plans submitted by the respective facilities in New Mexico. These reports were prepared under the Technical Enforcement Support (TES II) contract to assist EPA in the review of closure plans submitted by facilities pursuant to the loss of interim status (LOIS) provision. The closure plans reviewed for these reports were the most recent plans available to EPA and the contractor at the time of the reviews. These reports cover only the regulatory and technical deficiencies found in the closure plans. Those regulatory and technical requirements not mentioned in the reports were adequately covered in the plans. We have also enclosed a summary of deficiencies for each report. These reports are provided to you so that you may follow-up with any appropriate action. We will contact you at a later date as to your response.

If you have any questions regarding these reports, please call me or have your staff contact Matt Tokheim at (214) 655-6775.

Sincerely yours,

Sam Becker, P.E.
Chief
Hazardous Waste Compliance Branch (6H-C)
