Subject: Sampling/Analysis of CHEMPAK Prepared Lab Packs

Dear Patrick,

When lab packs are prepared by our personnel under the provisions of 49 CFR 173.12, no sampling or analysis is required for acceptance by any Rollins Environmental Services facility. The nature of lab packs is such that the wastes are not homogeneous and are present in small quantities. Since a detailed drum inventory sheet is prepared for each drum, which fully identified each inner container, any sampling or analysis serves little purpose.

Should you have any further questions on this or any subject, I can be contacted at 302-479-3446.

Sincerely,

A handwritten signature in black ink, appearing to read "Rean T. Swanson".
