Re: NPDES Permit No. NM0028355 - U.S. DOE Los Alamos National Laboratory
(University of California)

Dear Mr. Seasons:

The application for your expiring National Pollutant Discharge Elimination System (NPDES) permit was recently received in this office. In accordance with the Environmental Permit Regulations, (40 CFR 124.3(c), 48 FR 14153, April 1, 1983) your application has been reviewed and determined to be administratively complete. Please note that at the time your permit is processed for issuance, we may request additional information including effluent testing.

All permits are issued in accordance with Federal and State priorities for water pollution abatement. Therefore, it is possible that the processing of this application for your expiring permit may take some time depending on the relative priority of the discharge in comparison to all others. During the interim, you should continue to meet your existing permit requirements until such time as a new permit is issued.

Thank you for your cooperation. If you have any questions concerning your submittal, please contact Ms. Jenaie Franke at the above address or telephone (214) 665-7190.

Sincerely yours,

Jayne Fontenot
Chief
Permits Issuance Section (GW-PS)
