Dear Mr. Garcia:

Reference: NM 0890010515-1  
 RCRA Operating Permit

The State of New Mexico issued a hazardous waste permit jointly to the Department of Energy (DOE) and the University of California (UC) on November 8, 1989 for operation of treatment and storage units at the Los Alamos National Laboratory. Attachment I of the permit mandates solid waste stream characterization and submittal of requested information to the New Mexico Environment Department (NMED) on a quarterly basis.

In accordance with Permit Attachment I and a letter from the NMED to Harry T. Season, Jr., dated December 12, 1990, the DOE and UC are submitting the required summary report for the eighth quarter covering Technical Areas (TA) 33, 35, 36, and 37.

If I may be of further assistance in this matter, please contact Steve Slaten of my staff at 665-5050.

Sincerely,
