Dallas, Texas 75202

Dear Mr. Stone:

**RE: RESPONSE TO REQUEST FOR INFORMATION PURSUANT TO RCRA
SECTION 3007 (REQUESTS NOS. 6, 7, AND 8)**

This letter and enclosures respond to EPA's request of July 24, 1992 for information required pursuant to Section 3007 of RCRA. This submittal responds to Information Request Nos. 6, 7, and 8, and additional, supplemental information on 1 through 5 of your Attachment A. Please contact us if any part of this submittal requires clarification or is insufficient.

Enclosure A includes a narrative response to the information being provided pursuant to Information Requests Nos. 6, 7, and 8, and supplemental information for 1 through 5. I have included examples of supporting documentation in response to Information Requests Nos. 6, 7, and 8. These are but a small subset of the documentation available in support of the Laboratory's response. I understand that it is not your intent that the Laboratory submit all documents used to develop the response to your request for information, at this time. The Laboratory, however, is in the process of compiling all documentation used to support the information enclosed and will provide a comprehensive list of all pertinent information, such as number of pages, author, dates for each paper document; number of records in each database; and number of microfiche in archive. I want to assure you that it is the Laboratory's desire to comply fully with your information needs. Pursuant to my letter to Dr. Allyn Davis of September 11, 1992, I have requested a 30 day extension from September 14, 1992 to submit the listing of documents. We regret any misunderstanding that may have occurred during our prior submittal.

15256

TR

I would like to reiterate the Laboratory's intent to be completely responsive to your request. Please contact me if you have any questions or comments regarding this submittal.

Sincerely,

Allen J. Tiedman
Associate Director
for Operations
