Permit

BACKGROUND

A Hazardous Waste Facility Permit was issued to the Department of Energy and the University of California for Los Alamos National Laboratory by the New Mexico Environment Department on November 8, 1989. The Permit allows the Laboratory to operate certain hazardous waste management units. The permit includes requirements for personnel training, inspections, waste analysis, record-keeping, monitoring, accident prevention and emergency response. The hazardous waste management programs at Los Alamos National Laboratory, therefore the Permit requires periodic modification to remain current with Laboratory conditions.

EFFECT OF MODIFICATIONS

By making the modifications to the permit, Los Alamos National Laboratory can continue to operate in a manner that protects human health and the environment. Listed below are examples of changes that can be found in this set of modifications:

- Changes to the Laboratory's organizational structure
- Changes to the Laboratory's personnel status
- Correction of typographical errors in Permit text
- A manual treatment system is replaced with a mechanized one
- Waste codes are added to describe operations of the proposed mechanized treatment system
