MAR 02 1994

Mr. William Honker, Chief  
 RCRA Permits Branch  
 Hazardous Waste Management Division  
 U.S. EPA, Region 6  
 1445 Ross Ave., Suite 1200  
 Dallas, Texas 75202-2733

Dear Mr. Honker:

Enclosed is the response to the Notice of Deficiency (NOD) concerning Revision 3 of the Los Alamos National Laboratory Installation Work Plan (IWP). The NOD was received by this office on January 31, 1994. The enclosure shows the comments from the NOD and the proposed changes to be made to the IWP in response to the comments. When the responses are approved by the EPA, appropriately changed pages will be distributed to all who have received copies of the document.

Due to the extensive revision of Appendix K necessary, a complete version of Appendix K is included with strike-throughs to show the portions of the original text that are proposed for deletion and new text in bold. A new complete version of Appendix K will be issued when the change pages are issued for the rest of the document.

If you have any questions, please call Court Fesmire of my staff at (505) 665-4718.

Sincerely,

Joseph Vozella, Chief  
 Environmental, Safety and Health Branch

Enclosure:
