Ms. Stephanie Kruse  
New Mexico Environment Department  
Hazardous and Radioactive Materials Bureau  
525 Camino de los Marquez  
Santa Fe, New Mexico 87502

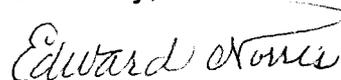

Dear Ms. Kruse:

At our meeting in Santa Fe on May 12 to discuss the closure plan for two surface impoundments at the Los Alamos National Laboratory, I said I would send you copies of Appendix H, Appendix J, and Appendix K of this Laboratory's Installation Work Plan for Environmental Restoration. Those three appendices are enclosed. Appendix J is the text from the November, 1993, submittal to the Environmental Protection Agency, Region 6. That Agency sent a Notice of Deficiency in January that resulted in changes to Appendix H and Appendix K. The revised versions of those two appendices are enclosed. Please note that we have received no information from Region 6 concerning our March 1 response to the Notice of Deficiency. Therefore, we do not know if this material is to be considered final.

I am enclosing as well this Laboratory's response to the Notice of Deficiency. The discussions in this document amplify the Laboratory's positions concerning some aspects of risk assessment. These might be of interest to you.

Please let me know if there is additional information you would like me to send.

Sincerely,

Edward Norris
