

LANL ER PROJECT
TELECONFERENCE NOTES

To: B. Hoditschek

From: T. Glatzmaier
J. Jansen
T. Taylor

Phone: 505-827-1558

Phone: 505-665-7203

Org: NMED

Org: UC, LAAO

Date: 6/10/96

Time: 1:00 p.m. MDT

Other Parties: S. Dinwiddie, T. Davis, NMED; K. Hill, EPA (on assignment to NMED)

Discussion:

1. **Lists of PRSs for NFA Permit Modification**--NMED has drafted two lists resulting from last year's two permit modifications. One list consists of PRSs requesting more information to be able to determine whether to remove the PRSs from the HSWA module; the other list requests more information to determine if the PRSs need to be added to the HSWA module. We had requested drafts of the lists to get started on gathering the information; however, we were told the lists would be part of an official letter we will be receiving in the future.

2. **Prioritization and Replan Discussion**--We informed NMED that we are on schedule to deliver the requested information on priority work and corresponding schedules for the next three years by July 10, 1996. We requested the letter NMED has drafted indicating their priorities in order to incorporate those priorities where necessary. The letter has been written and is being reviewed by NMED management. We can expect to receive the letter in the near future.

3. **FY95 Cleanup Reports**--We asked about the status of the NMED comments on the cleanup reports from last year. This has not been a high priority for NMED and therefore the comments have not been finalized. B. Hoditschek indicated she would talk to Benito Garcia to determine if this should be a high priority for NMED.

4. **June Meeting**--We discussed when to schedule the second of the regular meetings for June. We have tentatively scheduled June 25, 1996 from 1:00 to 4:00 p.m. in Santa Fe. LANL and NMED will talk to personnel in each organization to determine agenda items for this meeting.

5/17/96

TK

5. **FY96 Deliverables Schedule**--LANL will not receive a letter from NMED approving the schedule for RFI Reports for the remainder of this year. However, it was agreed that we will operate according to that schedule. T. Taylor will discuss how to report these dates on the Progress Tracking System with DOE-AL.

No action items were assigned.
