Re: OFF-SITE TREATMENT OF LANL WASTES

Dear Ms. Davis:

In response to your letter of 10 March 1997, I support the proposed Class 2 Permit Modification allowing Los Alamos National Laboratory to treat mixed waste off-site and to receive waste or waste residuals derived from that treatment. The ability to treat mixed wastes off-site will allow LANL to complete its environmental restoration in a more rapid and cost-efficient manner to the benefit of all citizens.

Sincerely,

Charles R. Wilson
