SUBJECT: NMR10A277, NOTICE OF TERMINATION

Dear Madam or Sir:

Enclosed in the University of California's Notice of Termination as permittee for the discharge of storm water from the remediation of an Environmental Restoration (ER) site. This ER site was located within the townsite of Los Alamos, New Mexico and had received a NPDES General Permit number of NMR10A277. This site has been stabilized and all storm water discharges associated with the remediation of the site have been eliminated.

If you have any further questions concerning the University of California's Notice of Termination, please contact Mike Alexander of the Laboratory's Water Quality and Hydrology Group at (505) 665-4752. Please direct all correspondence to:

Instructions for Completing Notice of Termination (NOT) Form		
Who May File a Notice of Termination (NOT) Form Permittees who are presently covered under an EPA-issued National Pollutant Discharge Elimination System (NPDES) General Permit (including the 1995 Multi-Sector Permit) for Storm Water Discharges Associated with Industrial Activity may submit a Notice of Termination (NOT) form when their facilities no longer have any storm water discharges associated with industrial activity as defined in the storm water regulations at 40 CFR 122.26(b)(14), or when they are no longer the operator of the facilities. For construction activities, elimination of all storm water discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with industrial activity from the construction site that are authorized by a NPDES general permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.
