September 15, 1997

**NOTICE OF INTENT  
TO APPROVE A  
MODIFICATION TO  
RCRA PERMIT NO. NM0890010515  
US DEPARTMENT OF ENERGY/  
LOS ALAMOS NATIONAL  
LABORATORY  
NEW MEXICO**

The State of New Mexico was authorized in 1986 to operate a hazardous waste management program in lieu of the Federal program for those portions of the Resource Conservation and Recovery Act (RCRA) in effect prior to the enactment of the Hazardous and Solid Waste Amendments of 1984 (HSWA). On January 2, 1996, the State was authorized to operate a hazardous waste management program for parts of HSWA. HSWA imposes additional Corrective Action requirements on hazardous waste management facilities for releases to the environment.

Under authority of the New Mexico Hazardous Waste Act (Section 74-4-1 et seq., "NMSA 1978, as amended, 1992) and the New Mexico Hazardous Waste Management Regulations (20 NMAC 4.1) the New Mexico Environment Department (NMED) can approve or deny hazardous waste permits and closure plans, permit modifications, and amendments.

Under this authority, NMED intends to approve, pending public input into this decision, a modification to the RCRA permit issued to the US Department of Energy/Los Alamos National Laboratory (DOE/LANL), New Mexico Permit No. NM08900515. LANL is a contractor-operated research facility under the administration of DOE.

The proposed modification will remove three (3) Solid Waste Management Units (SWMUs) from Tables A and C of the HSWA permit module.

Tables A and C lists site at LANL where Corrective Action to characterize and/or remediate past releases of hazardous wastes or hazardous waste constituents may be necessary. The basis for removal of these sites from the permit's approval of No Further Action (NFA) status. The three sites and justification for removal of these sites from LANL's permit are:

1. **Field Unit 1, SWMU 3-024, Tank and/or Associated Equipment** - NFA approved because there is no evidence that the site was used for the management of RCRA hazardous waste and/or hazardous waste constituents.
2. **Field Unit 1, SWMU 3-045(d), Storage Tank (Above Ground)** - NFA approved because the site was found to be a duplicate SWMU of SWMU 3-014(q).
3. **Field Unit 4, SWMU 52 002(a), Septic Tank and Seepage Pit (Active)** - NFA approved because the site was found to be a duplicate SWMU of SWMU 63-001(a).

The administrative record for this proposed action consists of this legal notice, a fact sheet, a statement of basis, the proposed revised Tables A and C, and a summary of public involvement activities. The administrative record may be reviewed from September 29 through November 12, 1997 at the following locations:

To obtain a copy of the administrative record or any part thereof, please contact John Kieling at the New Mexico Environment Department at the above address. Any person who wishes to comment on this permit modification or to request a public hearing should submit written comments/requests along with the commenters/requestors name and address to John Kieling at the above address. Requests for hearing should include a statement of the nature of the issues proposed to be raised. Only comments/requests received by November 12, 1997 will be considered. NMED will provide a 30-day notice of the public hearing if scheduled.

All written comments and issues raised at a Public Hearing, if held, will become part of the administrative record and will be considered in formulating the final decision. NMED may approve, or modify and approve, the requested permit modification based on the comments received. NMED will notify DOE/LANL and each person who submitted a written comment during the public comment period or testimony at a Public Hearing of the final decision, including any approved change to the proposed modification, and a detailed statement of reasons for any such change.
