1999

Dear Mr. Bearzi:

Subject: Resource Conservation and Recovery Act (RCRA) Permit Renewal Submittal
 – Supplement 6, Los Alamos National Laboratory (LANL) General Part B
 Permit Application, Revision 1.0, LANL Hazardous Waste Facility Permit
 No. NM0890010515-1

The purpose of this letter is to submit the subject document (Supplement 6) which should be included with the General Part B Permit Renewal Application (General Part B), submitted to your office on January 15, 1999. The Department of Energy (DOE) and the University of California (UC) agreed to "...provide (NMED) information regarding potential management of off-site generated waste streams at LANL." (Gurulé to Garcia, October 9, 1998 and January 15, 1999 transmittal letters.) The information/data in Supplement 6 is provided to the New Mexico Environment Department (NMED) pursuant to that agreement, and to support the renewal of the original LANL RCRA Hazardous Waste Facility Permit (the Permit) issued to DOE and UC by NMED on November 8, 1989.

The General Part B was submitted to your office on January 15, 1999. As indicated in the transmittal letter for the document, the information necessary to describe the acceptance of off-site waste needed to be developed and a supplement was reserved for that purpose. The sections attached include Supplement 6 with Table 6-1 that replaces the placeholder page at Supplement 6 of the General Part B and the new Table B-8 that replaces the placeholder at Appendix B, "Waste Analysis Plan," Table B-8. These pages have been designated Revision 1.0, addendum, May, 1999.

Supplement 6 describes both the hazardous and mixed waste streams that will be received at LANL via off-site shipments. For example, waste streams currently identified for receipt at LANL from the Sandia National Laboratory are contained in the tables provided in Supplement 6.
